

COMMERCIAL & INDUSTRIAL ICE PLANTS • WFI SERIES

Industrial Ice Flake Machines (1 to 30 Tons/Day)

Heavy-Duty Flake Ice Plants with Stationary Vertical SUS304 Evaporator Drums & Bitzer Compressors

Dry, Sub-Cooled -5°C to -8°C Flake Ice (1.5–2.2 mm Non-Clumping): Flat, edge-free thin flakes provide 3× faster cooling than block ice without bruising delicate fish skins, poultry flesh, or fruit.

Win Equipments WFI Series features a stationary vertical food-grade SUS304 stainless steel evaporator drum. By rotating only the internal spiral stainless steel scraper blade, high-pressure dynamic rotary refrigerant seals are completely eliminated, permanently preventing gas leaks.

STATIONARY DRUM

-5°C TO -8°C FLAKES

BITZER / FRASCOLD

SHELL & TUBE CONDENSER

1–30 TPD

DAILY OUTPUT RANGE

-5°C to -8°C

ICE TEMPERATURE

1.5–2.2 mm

FLAKE THICKNESS

SUS304

FOOD GRADE DRUM

CORE ENGINEERING ADVANTAGES

Vertical Stationary Drum

Static refrigeration piping with internal geared rotating scraper eliminates rotating carbon seals, ensuring zero refrigerant loss and lifelong reliability.

Semi-Hermetic Bitzer

Heavy-duty Bitzer and Frascold semi-hermetic reciprocating compressors engineered for low-temperature evaporation and high ambient condensation.

Water-Cooled Shell & Tube

High-efficiency cleanable shell & tube condenser connected to cooling tower maximizes COP and guarantees rated daily flake ice production even at 45°C ambient.

TARGET INDUSTRIAL APPLICATIONS

Commercial Marine Fisheries & Harbor Preservation

Poultry & Meat Processing Abattoirs

Mass Concrete Dam & Bridge Batching Pre-Cooling

Chemical Dye Synthesis & Diazotization

Bakery Dough & Food Grade Chilling
